

Lanier

Waterproof Lake Map Number 301

With Southern Lake Enlargement

Lake Location

Located North of Buford, Georgia

Information About The Lake

Buford Dam and Lake Lanier were authorized by Congress in 1946, and construction was completed in 1957. The lake, which extends 44 miles up the Chattahoochee River and 19 miles up the Chatahoochee River, provides power production, flood control, water supply, and fish and wildlife management. It also provides recreation opportunities for millions of visitors each year. In fact, Lanier is the most visited Corps lake in the nation. This is due in part to its close proximity to metropolitan Atlanta. Lake Lanier Islands, Resource Manager

developed by the State of Georgia and the Corps of Engineers, is the major resort area on the lake. Following are some pertinent lake facts and information sources.

Lake Area 38,000 Acres
Length of Shoreline 540 Miles
Normal Summer Pool Elevation 1071' MSL

For more information, contact the Resource Manager's office or call:
