Lake Bottom Legend

Interpretation of a lake bottom from a contour map is based on the spread of the contour interval lines. The closer together these lines are, the faster the slope. At the extreme, lines directly on top of each other indicate a straight drop or bluff, while the absence of lines (or lines that are widely spread) indicate a relatively flat area. The contour interval may vary from 2.5 feet to as much as 80 feet depending on the prevailing geographical conditions and the practicality of interpretation. The contour lines may be marked as the number of feet above sea level, or as the actual depths when the lake is at maximum power pool. When actual depth designations are used, true depth must be adjusted by the current variation of the lake level from the maximum power pool elevation.

QUICK, DELICIOUS PAN-FRIED FISH

- 2 T. cooking oil
2 T. butter or margarine
Heat in skillet just until bubbly.
1 C. self-rising white corn meal
1 t. salt
1 C. pepper

Mix above three ingredients in paper or plastic bag.
Place serving size pieces of fish fillets (one or two at a time) in bag and shake carefully to coat. Brown fillets in skillet until golden brown and crispy on each side (two to three minutes each side). Don't overcook!

Optional Lemon-Butter Sauce

- 1 C. butter or margarine
Juice of one lemon
Sprinkle of salt
1 T. minced parsley
Combine all ingredients, then pour over hot fish. Serve immediately.
