Oklahoma

Topographic Map for Fishing, Boating, and Recreation

**OUR PROMISE TO YOU**  
This map is now published by Kingfisher Maps, Inc. We are currently in the process of updating and improving the overall quality of this map. Some changes are already incorporated, such as the use of the new waterproof, tearproof material it is printed on. More improvements are being incorporated with each printing. We promise you superior quality, prompt and friendly service, and lasting value. You may direct your ideas, suggestions, or comments by calling 803 882-5840. Thank you!

**QUICK, DELICIOUS PAN-FRIED FISH**

1. cooking oil
2. butter or margarine
3. salt
4. self-rising white corn meal
5. fish
6. pepper

Mix above three ingredients in paper or plastic bag. Place serving size pieces of fish fillets (one or two at a time) in bag and shake carefully to coat. Brown fillets in skillet until golden brown and crispy on each side (two or three minutes each side). Turn over once.

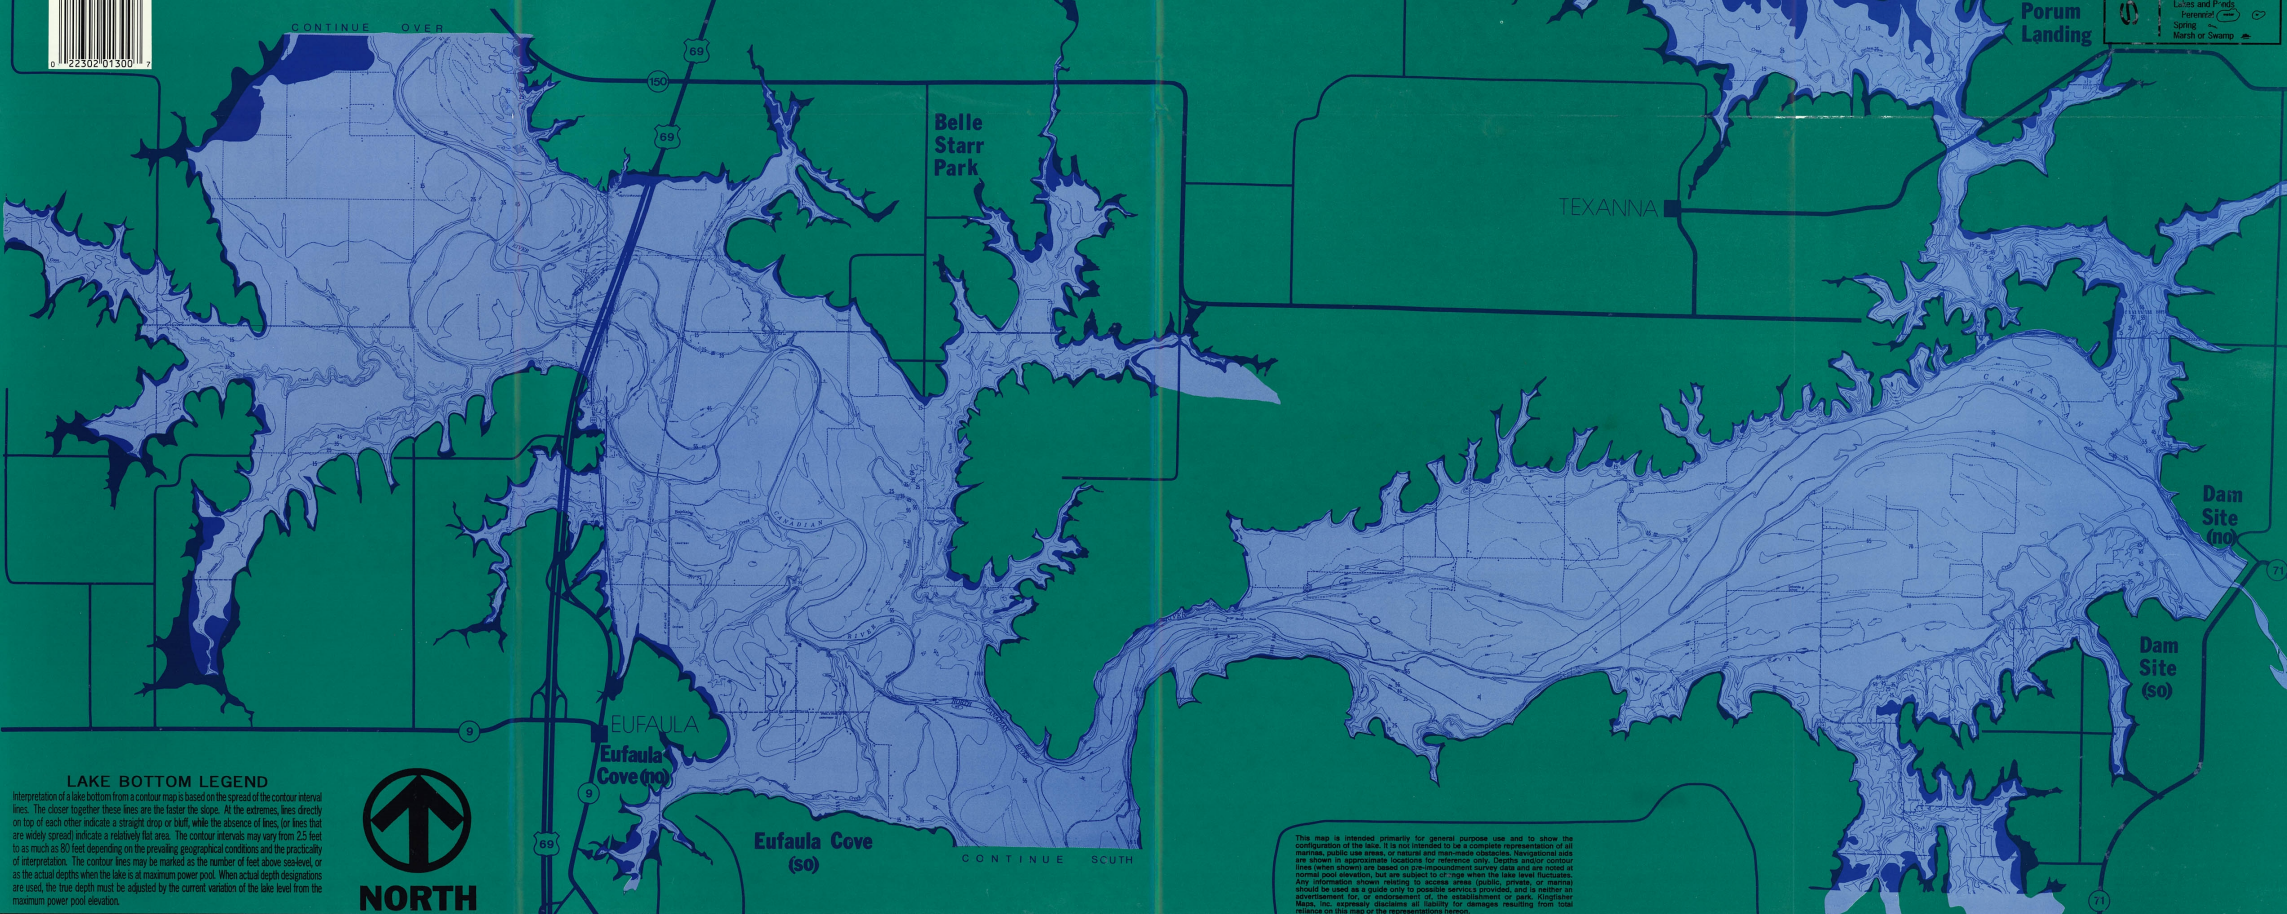

**Original Lemon-Butter Sauce**

1. butter or margarine
2. lemon juice
3. white wine
4. salt
5. pepper

Combine all ingredients, then pour over hot fish. Serve immediately.

**SYMBOLS KEY**

- Highways: Good Motor, Poor Motor, Trail
- Railroads: Single Track, Tunnel
- Buildings: Church, Cemetery
- Dams: Dam, Dam Site
- Leaves: Leaf, Leafy Branch
- Gravel Pit: Gravel Pit
- Power Line: Power Line
- Tasks: Task, Task Site
- Cemetery: Cemetery, Double-line
- Stream: Stream, single-line
- Powerline: Powerline
- Canal and Ditches or Other: Canal and Ditches or Other
- Lake and Pond: Lake and Pond
- Spring: Spring
- Marsh or Swamp: Marsh or Swamp

**LAKE BOTTOM LEGEND**  
Interpretation of a lake bottom from a contour map is based on the spread of the contour interval lines. The closer together these lines are the faster the slope. At the extremes, lines directly on top of each other indicate a straight drop or barf, while the absence of lines (or lines that are widely spaced) indicate a relatively flat area. The contour intervals may vary from 25 feet to as much as 80 feet depending on the prevailing geographical conditions and the practicality of interpretation. The contour lines may be marked as the number of feet above sea level, or as the actual depths when the lake is at maximum power pool. When actual depth designations are used, the true depth must be adjusted by the current variation of the lake level from the maximum power pool elevation.

This map is intended primarily for general purpose use and to show the configuration of the lake. It is not intended to be a complete representation of all features. Public use areas, or fishing and other recreational areas, are shown in appropriate locations for reference only. Depths and/or contour lines shown are based on the measurements taken and are subject to normal pool elevation, but are subject to change when the lake level fluctuates. Any information shown relating to access areas, public, private or marina should be used as a guide only to possible services provided, and is neither an endorsement for, or endorsement of, the establishment or use. Kingfisher Maps, Inc. expressly disclaims all liability for damages resulting from total reliance on this map or the representations herein.
