Topographic Map for Fishing, Boating, and Recreation

NEW!
WATERPROOF
TEARPROOF

OUR PROMISE TO YOU
This map is now published by Kingfisher Maps, Inc. We
understand that you are looking for a map that shows the
overall quality of the lake, including the shoreline, the
depths, and the location of the various points of interest.
We have incorporated all of this information into this map,
being incorporated with each printing. We promise you
that this map is the best of its kind. We will continue to
improve it as we receive your suggestions and
comments by calling 800-882-5840. Thank you!

EASY BAKED FISH FILLETS
Heat oven to 350°. Sprinkle both sides of fillet with salt and pepper, then set aside until later.
1 C. Melted butter, margarine, or oil
1 T. Lemon juice
1 T. Mixed onion
Combine the above three ingredients. Dip each fillet into the mixture and place on baking dish. Drizzle remaining butter mixture over fillets.
Bake 25 to 30 minutes, or until fish flakes easily with a fork. Do not overcook. Sprinkle fillets lightly with paprika, then serve with tartar sauce, lemon, or hot sauce. A nice hot sauce can be made by combining chili sauce, a small drop of tabasco, and lemon juice, and then heating the mixture. Enjoy!

QUICK, DELICIOUS PAN-FRIED FISH
2 T. cooking oil
2 T. butter or margarine
Heat in skillet just until bubbly.
1 C. self-rising white corn meal
1 t. salt
1 t. pepper
Mix above three ingredients in paper or plastic bag. Place serving size pieces of fish fillets (one or two at a time) in bag and shake carefully to coat. Brown fillets in skillet until golden brown and crispy on each side (two to three minutes each side). Don't overcook!
Optional Lemon-Butter Sauce
1 C. butter or margarine
Juice of one lemon
Sprinkle of salt
1 t. minced parsley
Combine all ingredients, then pour over hot fish. Serve immediately.

This map is intended primarily for general purpose use and to show the configuration of the lake. It is not intended to be a complete representation of all marinas, public use areas, or natural and man-made obstacles. Navigational aids are shown in approximate locations for reference only. Depths and/or contour lines (when shown) are based on pre-imposed survey data and are noted at normal pool elevation, but are subject to change when the lake level fluctuates. Any information shown relating to access areas (public, private, or marina) should be used as a guide only to possible services provided, and is neither an advertisement for, or endorsement of, the establishment or park. Kingfisher Maps, Inc. expressly disclaims all liability for damages resulting from total reliance on this map or the representations herein.

LAKE BOTTOM LEGEND
Interpretation of a lake bottom from a contour map is based on the spread of the contour interval lines. The closer together these lines are the faster the slope. At the extremes, lines directly on top of each other indicate a straight drop or bluff, while the absence of lines, (or lines that are widely spread) indicate a relatively flat area. The contour intervals may vary from 2.5 feet to as much as 80 feet depending on the prevailing geographical conditions and the practicality of interpretation. The contour lines may be marked as the number of feet above sea-level, or as the actual depths when the lake is at maximum power pool. When actual depth designations are used, the true depth must be adjusted by the current variation of the lake level from the maximum power pool elevation.
