

**EASY BAKED FISH FILLETS**  
Heat oven to 350°. Sprinkle both sides of fillet with salt and pepper, then set aside until later.  
½ C. Melted butter, margarine, or oil  
1 T. Lemon juice  
1 t. Minced onion  
Combine the above three ingredients. Dip each fillet into the mixture and place on baking dish. Drizzle remaining butter mixture over fillets.  
Bake 25 to 30 minutes, or until fish flakes easily with a fork. Do not overcook. Sprinkle fillets lightly with paprika, then serve with tartar sauce, lemon, or hot sauce. A nice hot sauce can be made by combining chili sauce, a small drop of tabasco, and lemon juice, and then heating the mixture. Enjoy!

This map is intended primarily for general purpose use and to show the configuration of the lake. It is not intended to be a complete representation of all marinas, public use areas, or natural and man-made obstacles. Navigational aids are shown in approximate locations for reference only. Depth and contour lines (when shown) are based on pre-impoundment survey data and are noted at normal pool elevation, but are subject to change when the lake level fluctuates. Any information shown relating to access areas (public, private, or marina) should be used as a guide only to possible services provided, and is neither an advertisement for, nor endorsement of, the establishment or park. Kingfisher Maps, Inc. expressly disclaims all liability for damages resulting from total reliance on this map or the representations herein.

**LAKE BOTTOM LEGEND**  
Interpretation of a lake bottom from a contour map is based on the spread of the contour interval lines. The closer together these lines are the faster the slope. At the extremes, lines directly on top of each other indicate a straight drop or bluff, while the absence of lines, (or lines that are widely spread) indicate a relatively flat area. The contour intervals may vary from 2.5 feet to as much as 80 feet depending on the prevailing geographical conditions and the practicality of interpretation. The contour lines may be marked as the number of feet above sea-level, or as the actual depths when the lake is at maximum power pool. When actual depth designations are used, the true depth must be adjusted by the current variation of the lake level from the maximum power pool elevation.

# Map Number 1304 FORT GIBSON Oklahoma

Topographic Map for Fishing, Boating, and Recreation

**OUR PROMISE TO YOU**  
This map is now published by Kingfisher Maps, Inc. We are currently in the process of updating and improving the overall quality of this map. Some changes are already incorporated, such as the use of the new waterproof, tearproof material it is printed on. More improvements are being incorporated with each printing. We promise you superior quality, prompt and friendly service, and lasting value. You may direct your ideas, suggestions, or comments by calling 853 882-5840. Thank you!
