Topographic Map for Fishing, Boating, and Recreation

This map is now produced by Kingfisher Maps, Inc. We are currently in the process of updating and improving the overall quality of this map. Some changes are already incorporated, such as the use of the new waterproofed material it is printed on. More improvements are being incorporated with each printing. We promise you, our supplier quality, prompt and friendly service, and lasting value. You may direct your ideas, suggestions, or comments by calling 803 882-5640. Thank you!

This map is intended primarily for general purpose use and to show the configuration of the lake. It is not intended to be a complete representation of all the features of the lake. It is not intended to show the location of all the marinas, public use areas, or natural and man-made obstacles. The original data are shown in approximate locations for reference only. Depths and/or contour lines (when shown) are based on pre-impoundment survey data and are noted at normal pool elevation, but are subject to change when the lake level fluctuates. Any information shown relating to access areas (public, private, or marina) should be used as a guide only. No guarantee is made for the accuracy of the information for, or endorsement of, any possible services provided, and is neither an advertisement for, or endorsement of, any business, service, or park. Kingfisher Maps, Inc. expressly disclaims all liability for damages resulting from total reliance on this map or the representations herein.

LAKE BOTTOM LEGEND

Interpretation of a lake bottom from a contour map is based on the spread of the contour interval lines. The closer together these lines are the faster the slope. At the extremes, lines directly on top of each other indicate a straight drop or bluff, while the absence of lines, (or lines that are widely spread) indicate a relatively flat area. The contour intervals may vary from 25 feet to as much as 80 feet depending on the prevailing geographical conditions and the practicality of interpretation. The contour lines may be marked as the number of feet above sea-level, or as the actual depths when the lake is at maximum power pool. When actual depth designations are used, the true depth must be adjusted by the current variation of the lake level from the maximum power pool elevation.

NORTH

EASY BAKED FISH FILLETS

Heat oven to 350°. Sprinkle both sides of fillet with salt and pepper, then set aside until later.

$\frac{1}{4}$ C. Melted butter, margarine, or oil
1 T. Lemon juice

1 t. Minced onion

Combine the above three ingredients

Dip each fillet into the mixture and place on baking dish. Drizzle remaining butter mixture over fillets.

Bake 25 to 30 minutes, or until fish flakes easily with a fork. Do not overcook.

Sprinkle fillets lightly with paprika, then serve with tartar sauce, lemon, or
