

**LAKE FORK RESERVOIR**  
Lake Fork Reservoir was formed in 1980 when Lake Fork Creek was impounded by the Sabine River Authority. The lake reached its current pool level of 403 feet above sea level in 1985 with approximately 22,500 acres on the surface. The reservoir extends up the Lake Fork Creek channel for 15 miles and the Casey Creek for 10 miles. The dam is almost 2.5 miles long.  
  
The state record for largemouth bass was caught here in January of 1992 at 16.18 pounds. Channel and blue catfish, black and white crappie, bluegill, and red-ear sunfish are also taken in large numbers from the reservoir.

Facility Name	Telephone Number	Boat Ramp	Public Boat Ramp	Private Boat Ramp	Tire Reef	Restricted Area	Gasoline	Facility Reference	Water Depth up to 23'	Water Depth 24' to 43'	Water Depth more than 43'
